

All About Your MHP Select Plan

Something for Everyone!

McLaren Health Plan Select plan uses a focused HMO network of doctors, hospitals and treatment centers in our “Select” network of counties. You choose a primary care physician or PCP within this “Select” network. No referrals are required, but some services require preauthorization.

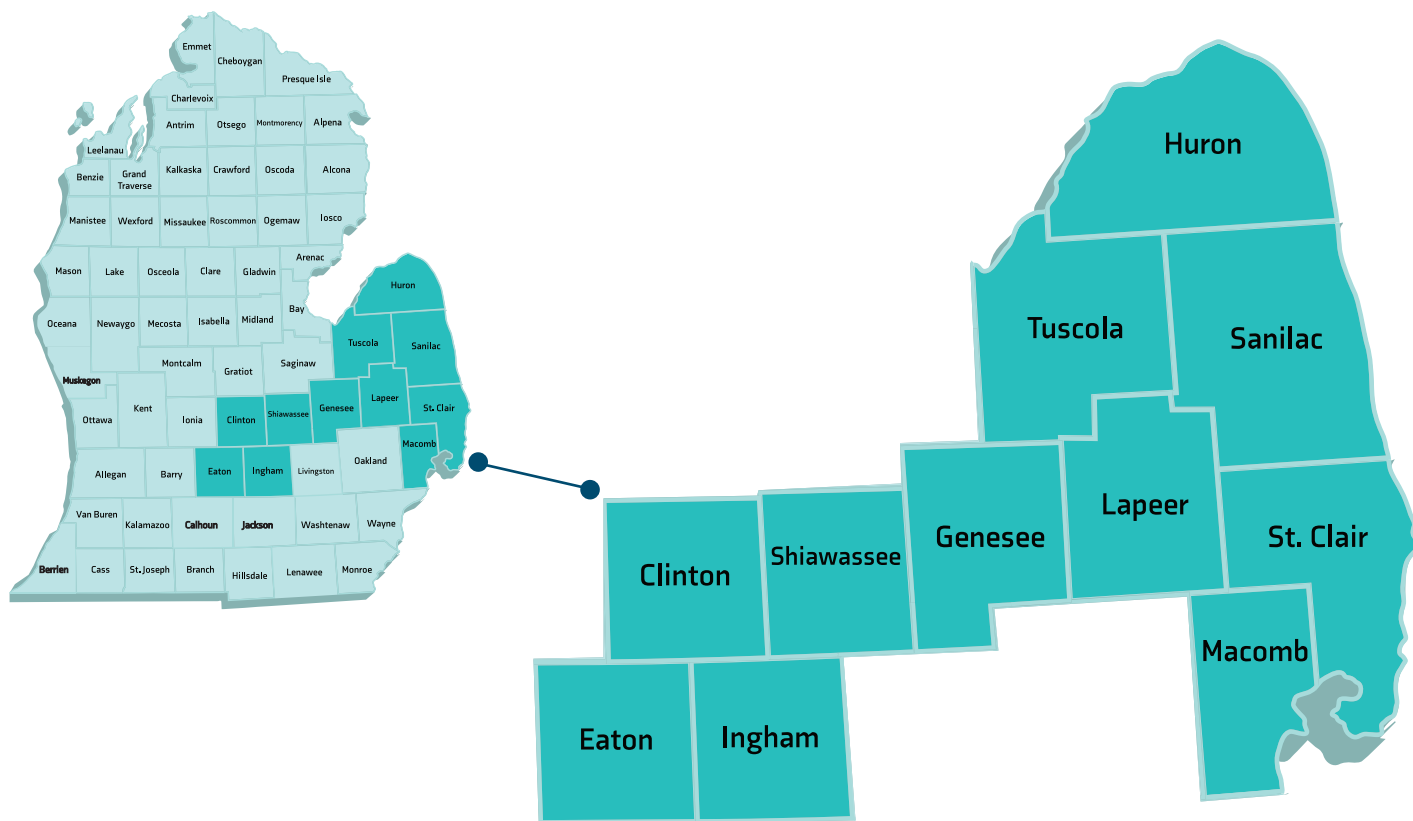

WHAT DO I HAVE TO DO?

- 1** Choose a PCP from the McLaren Health Plan Select network.
- 2** Use the specialists and hospitals within the Select network to receive your care.
- 3** Get approval (called prior authorization) for services outside of the Select network.

There are hundreds of providers to choose from, along with urgent care clinics, imaging centers, pharmacies and more. Go to www.McLarenHealthPlan.org to learn more.

If a specific service (procedure code) is not available within the Select network, the Medical Management team at McLaren Health Plan will work with you and your primary care and/or specialist physician to coordinate your care with providers who contract with McLaren, or with providers who offer the type of specialty care required, so you can receive the needed care.

WHERE IS THE SELECT NETWORK?

WHAT DO I PAY AND WHAT DOES MHP PAY?

At the beginning of your plan year, you may have to meet your deductible before some services are covered. Annual exams or preventive services are covered with no cost share.

You might have to pay a copay each time you see a provider or get a prescription. This is a set dollar amount.

Coinsurance starts after you reach your deductible. This is the amount shared by you and McLaren Health Plan.

The out-of-pocket-limit is an amount you've reached by paying deductibles, copays and coinsurance and is the most you will have to pay in a plan year. At that point, McLaren Health Plan will cover your health care services 100%.

A McLaren Health Plan Select Plan is a convenient way to stay connected with the doctors, specialists and hospitals close to home and still get the same, high-quality care you expect and deserve.
